

Open Forum Presentation and Discussion

Invitation to the Zambian open forum presentation and discussion on **Larval Source Management for Urban Malaria Elimination: The unexploited intervention. How and who to serve it?**

The open forum for LSM for malaria elimination invites some presentations, discussions on how the intervention can be revived and strengthened in the Zambian set-up. The forum provides plentiful networking among partners in vector control fraternity and beyond that sparks the generous sharing of ideas and information for LSM revival and strengthening in the urban set-up. Content highlights for this meeting include continued discussion on the:

- 1)** Status of Larval Source Management implementation in Zambia
- 2)** Urban malaria: A growing threat to public health in Zambia: a public health perspective
- 3)** Applicability of available technologies for adaptive integrated Vector Management
- 4)** Experiences and lessons learnt in deployment of LSM. A country/company perspective
- 5)** Role of Partnership [Public Private Partnership-PPP] in LSM
- 6)** Role of the Local Authority in the infectious diseases control. A case for Malaria Larval Source Management in Zambia [Livingstone, Nakonde & Kitwe Local Authorities]
